- B. The writer was compelled by circumstances to leave her job.
- C. A lateral move means stepping out of full-time employment.
- D. The writer was only too eager to spend more time with her family.

- Although we focus on the needs of exceptional children, we find ourselves describing their environment as well. While the leading actor on the stage captures our attention, we are aware of the importance of the supporting players and the scenery of the play itself. Both the family and the society in which exceptional children live are often the key to their growth and development. And it is in the public schools that we find the full expression of society’s understanding — the knowledge, hopes, and fears that are passed on to the next generation.

17. In Paragraph 2, the author cites the example of the leading actor on the stage to show that \_\_\_\_\_.

- A. the growth of exceptional children has much to do with their family and the society
- B. exceptional children are more influenced by their families than normal children are
- C. exceptional children are the key interest of the family and society
- D. the needs of the society weigh much heavier than the needs of the exceptional

children

- Tourists were surprised to see a woman driving a huge orange tractor down one of Rome's main avenues. Italy's political leaders and some of its male union chiefs are said to have been even more puzzled to see that the tractor was followed by about 200, 000 women in a parading procession that took more than three hours to snake through central Rome.

- D. at a leisurely pace through central Rome."

- The planet Venus is only slightly smaller than Earth; it is the only other object in the solar system, in fact, that even comes close to earth's size. Venus has a similar density, so it is probably made of approximately the same stuff, and it has an atmosphere, complete with clouds. It is also the closest planet to earth, and thus the most similar in distance from the sun. In short, Venus seems to justify its long held nickname of "earth's twin".

19. Venus is similar to Earth in\_\_\_\_\_.

- A. size and density
- B. distance from the sun
- C. having atmosphere
- D. all of the above
